

Task:

Create a Windows Forms application that:

- Reads XML file
- Displays data in a DataGridView
- Saves a Data
- Use the **books.xml** that is in the folder.
- Displays data in textboxes or labels

Deadline: May 12, 2026

What to submit:

- Screen Recording of the activity while doing it.
- Upload your activity in this google drive link:
<https://drive.google.com/drive/folders/10iru1cWKt38kVSuzFs0exDYec-CWl-O-?usp=sharing>
- Include in your video a short reflection discussing the learnings and insights you gained from the topic.
- The video should ideally not exceed 10 minutes. However, you may go beyond this limit if necessary, as long as all tasks are clearly explained.
- You are allowed to speed up the video (e.g., 2x), as long as your explanation remains understandable.
- Ensure that both your screen and voice are clear throughout the recording.
- Video Filename: Lastname_Worksheet4 (e.g., Tumanan_Worksheet4)
- Additional points will be given to students who make their videos more engaging through appropriate editing, similar to tutorial-style videos on YouTube

Tools:

- C# Windows Forms

System.Xml	Used for reading, writing, and manipulating XML files
System.Xml.Linq	Uses LINQ to easily manage XML documents
System.IO	Used

Note: Check the whole folder for Sample Codes. Thank you and God bless!
